Executive Summary

Purpose

Best Practices Cultural Competence is a web application that provides an online system for reviewers to discover and access the teaching practices that are paramount to the success of diverse ethnic groups in academia. This web application is created for the intent to be used for the systematic review protocol "Educational Interventions on Culturally Competent Healthcare: A Systematic Review of the Rationale, Content, Teaching Methods, and Measures of Effectiveness".

The users will be able to perform the following primary functions:

Feature	Description
Study Inventory	Upload and provide article information
Article Screening Checklist	Decision to include or exclude articles from study
Data Extraction	Dissect article information
QUESTS Appraisal	Score articles on purpose and dimensions
Kirkpatrick Rating	Grade articles for contribution to teaching

Scope

- ◆ There are two basic users – Reviewers and Administrators.
- ◆ All Reviewers will be able to access the five primary features: Study Inventory, Article Screening Checklist, Data Extraction, QUESTS Appraisal and Kirkpatrick Rating.
- ◆ Administrators have access to view and edit all reviewers' submissions, assign new reviewers and add/delete and register users.
- ◆ Administrators have the ability to export all features information to excel sheets.

Domain

The domain and server will be hosted on web.com and titled useted.org. To be accessed by reviewers and admin the url will be hosted on Xavier University of Louisiana website as www.xula.edu/BPCC. Users will be redirected to useted. org.

Front End Capabilities

I. Reviewers

A. Home

1. Reviewers will be able to login/logout
2. Reviewers will be able to reset password

B. Reviewer's Menu

1. Reviewers will be able to access the following features:
 - a. Upload papers
 - b. Review Papers
 - c. Article Screening Checklist
 - d. Quest Appraisal
 - e. Kirk Patrick Rating
- C. Study Inventory
 1. Reviewers will be able to submit, edit and review resource information based on the Study Inventory Form.
- D. Article Screening Checklist
 1. Reviewers will be able to download and view assigned articles
 2. Reviewers will be able to submit, view and edit assigned Articles Checklist Screenings
- E. Data Extraction
 1. Reviewers will be able to submit, edit, and view assigned articles' Data Extraction
 2. Reviewers will be able to edit and view Data Extractions submitted by one other reviewer that were assigned the same articles to data extract
- F. QUESTS Appraisal
 1. Reviewers will be able to submit, edit and view assigned QUESTS for articles
- G. Kirkpatrick Rating
 1. Reviewers will be able to submit, edit and view assigned Kirkpatrick for articles

II. Administrators

- A. Users
 1. Admin will be able to update and delete current reviewers.
 2. Admin will be able to register new reviewers.
- B. Articles
 1. Admin will be able to view the article, the names of the three reviewers that submitted an Article Screen Checklist and the Study Inventory submission for each article.
 2. Admin will be able to view and edit Study Inventory Forms.
- C. Reviews
 1. Admin will have access to flag and un-flag reviews:
 - a. Flag Articles

- 1) Admin will be able to assign a third reviewer to an article if the two reviewers are undecided about including or excluding the article or if there is a contradiction amongst their submission.
 - 2) Admin will be able to view and edit each of the three reviewers' Article Screening Checklist.
 - b. Included and Excluded Articles
 - 1) Admin will be able to view the article of the two reviewers that submitted an Article Screening Checklist.
 - 2) Admin will be able to view the submission of the Article Screening Checklist of the two reviewers.
 - 3) Admin will be able to view the list of included and exclude articles.
- D. Data Extractions
 1. Admin will be able to view the article's data that was extracted.
 2. Admin will be able to view and edit the Data Extraction.
- E. QUESTS Appraisals
 1. Admin will be able to view the paper and its Data Extraction.
 2. Admin will be able to view and edit each QUESTS submitted by a reviewer as well as view the score associated with their submission.
- F. Kirkpatrick Rating
 1. Admin will be able to view the article that corresponds to each Kirkpatrick Rating submission.
 2. Admin will be able to view and edit each of the three reviewers' Kirkpatrick Rating submission.

Back End Capabilities

- A. Study Inventory
 1. Upon submission the article code will be created and two reviewers will be assigned.
 - a. The reviewers assigned to these articles will continue to perform the other steps on their assigned articles unless the article is excluded during the Article Screening process.
- B. Article Screening Checklist

1. With this step once an article is included, it will proceed to the other steps to be completed if included.
 2. Reviewers will screen articles blindly.
 3. Two reviewers are assigned to screen each article.
- C. Data Extraction
1. Only one reviewer can perform the initial Data Extraction for an article; however the two reviewers initially assigned to it can view and edit it.
- D. QUESTS Appraisals
1. Three reviewers will complete QUESTS independently.
 2. Score will be calculated on database side.
- E. Kirkpatrick Rating
1. Three reviewers will complete Kirkpatrick Rating independently.
- F. Reset Password
1. Email will be sent to their email address with chance to reset password.
- G. Review Process
1. Each individual paper must be done in the following sequential order if included: upload, article screening, data extraction, quest and lastly Kirkpatrick Rating. If excluded will not proceed after article screening
- H. Article Duplication Controller
1. Each individual paper must be processed through the duplication controller that will be used by Admin.
 2. The code of the articles that are duplicated will not be reassigned.
